Encompass / Zody Chairs

# Zody

Designed By [Michael Welsh](#) & [ITO Design](#)

Zody is a high-performing chair, blending science-based wellness and comfort with sustainability and international design.

A casual glance at the Zody makes it clear that this is a serious task chair with a full assortment of adjustment settings. It can look quite cool if you go with a [custom spec](#) or it could easily fit in any office atmosphere, as is befitting our model's aesthetics. As far as overall visual appeal goes the Zody can scale anywhere from quite impressive, with the mirror-polished parts and custom fabric to better-than-average, with plain black materials and gray hardware.

As far as comfort goes, the Zody is highly customizable. This is thanks to adjusts in the arms (height, side-to-side angle, forward/backward and left/right positioning), seatpan (front and back), seat height, lumbar, and recline tension.

The issue will arise if you have installed SQL with the default collation and your machine is using English (US). Now say for example you want to do business in a country where the default language is other than English (US) and default date format is "DD-MM-YYYY" instead of MM-DD-YYYY". Moreover, your application have already been developed and the code cannot be changed to accept the date format in "MM-DD-YYYY".
